Ashutosh Singh

ASPIRING SOFTWARE ENGINEER · JAVA DEVELOPER · AI / ML ENTHUSIAST

+91 91295 78555 | Gmail | GitHub | LinkedIn | LeetCode | Portfolio

Greater Noida, Uttar Pradesh, India

OBJECTIVE

B.Tech Computer Science & Engineering undergraduate (Specialization: Artificial Intelligence, NIET Greater Noida, May 2027) with a strong foundation in Data Structures & Algorithms using Java, practical experience building and deploying machine learning models, and hands-on skills in full-stack web development. Seeking software engineering internships and SDE roles where I can apply my problem-solving ability, contribute to scalable product development, and grow within a high-performance engineering team.

EDUCATION

B.Tech — Computer Science & Engineering | Specialization: Artificial Intelligence *Aug 2023 – May 2027*

Noida Institute of Engineering and Technology (NIET), Greater Noida

CGPA: 7.5 / 10

Relevant Coursework: Data Structures & Algorithms · Machine Learning · Database Management Systems · Operating Systems · Object-Oriented Programming · Computer Networks

Class XII — Science (PCM) | CBSE Board *2021 – 2022*

Guru Kripa Divine Grace Public School

Percentage: 71%

TECHNICAL SKILLS

Languages	Java *(primary)*, Python, JavaScript, SQL, HTML5, CSS3
DSA Topics	Arrays, Strings, Linked Lists, Trees, Graphs, Binary Search, Sorting, Dynamic Programming, Hashing, Two Pointers, Sliding Window
Problem Solving	LeetCode — @Ashutosh_singh09 · Language: Java · Consistent daily practice
AI / ML	Machine Learning, Scikit-learn, Pandas, NumPy, Matplotlib
Frameworks	Flask
Databases	MySQL, MySQL Workbench
Tools & Platforms	Git, GitHub, VS Code, IntelliJ IDEA, Jupyter Notebook, Google Colab
CS Fundamentals	OOP, DBMS, Operating Systems, Computer Networks

PROJECTS

Crop Recommendation System *Mar – Apr 2025*

Python · Scikit-learn · Random Forest · Flask · Pandas · NumPy · HTML5 · CSS3 GitHub ↗

- Built an ML-powered web application recommending optimal crops based on soil parameters (N, P, K, temperature, humidity, pH, rainfall).
- Benchmarked **5+ classification algorithms**; achieved **95%+ accuracy** using Random Forest after hyperparameter tuning and preprocessing.
- Deployed the trained model as a **Flask REST API** connected to a responsive frontend displaying predictions with confidence scores.
- Executed a complete ML pipeline: data cleaning, EDA, feature engineering, model selection, cross-validation, and performance evaluation.

Personal Portfolio Website *2024 – Present*

HTML5 · CSS3 · Vanilla JavaScript GitHub ↗

- Designed and developed a fully responsive portfolio with pure HTML, CSS, and Vanilla JavaScript — **zero external frameworks**.
- Integrated the **LeetCode API** to fetch and display live problem-solving statistics (total, easy, medium, hard counts).
- Implemented smooth scroll animations (IntersectionObserver), typing effect, and particle canvas background for an engaging user experience.
- Structured for recruiter screening: skills, projects, DSA stats, education, certifications, and a functional contact form.
